authority

1. **Rules for application for applying the Health Card (above 18 age):**

   ➢ **Fresh User to the portal**

      ✓ **User should register on Health Card portal.**
         - For the registration user should provide his/her details like Full name , Age , Email ID and have to set the password.

      ✓ **After registration user should login to his/her account.**
         - For the login user should provide it's Email ID & password that had given at the time of registration .

         - At the time of login if the user is forgot his/her password then for setting the new password message will be sent to his/her verified Email address. Then the verified user can change his/her password.

         - When user click on login , verification link will be sent to the user's verified email address so this provides authentication. If the authenticated user is there then they can verify the message . After verifying user is getting successfully login into his/her Health Card account.

         - After the successful login , 14 digit Health ID is automatically gets generated. And this is the Unique ID for the each user.

      ✓ **User should create his/her profile.**

         - In the profile user can change it's personal details also they can update the profile photo.

         - Also the user can see the generated Health ID on his/her profile.
